

Administrative Supplements for Development of Risk-Stratified Cancer Survivorship Care Algorithms

NOT-CA-20-038

Using WebEx and Webinar Training Logistics

- All lines will be in listen-only mode
- Submit questions at any time during the presentation. Type into the Q&A Panel and select Host
- A moderator will ask the question on your behalf during the Q&A portions of the training
- This training webinar is being recorded and will be posted at a later date

Webinar presenters

Michelle Mollica, PhD,
MPH, RN, OCN
Program Director,
Healthcare Delivery
Research Program

Lisa Gallicchio, PhD
Program Director,
Epidemiology and
Genomics Research
Program

1. *Background*
2. *Supplement notice details*
3. *Questions*
 - *Note: questions about specific projects will not be addressed*
 - *Note: questions about COVID-19 supplements will not be addressed. Please see: <https://grants.nih.gov/policy/natural-disasters/corona-virus.htm>*

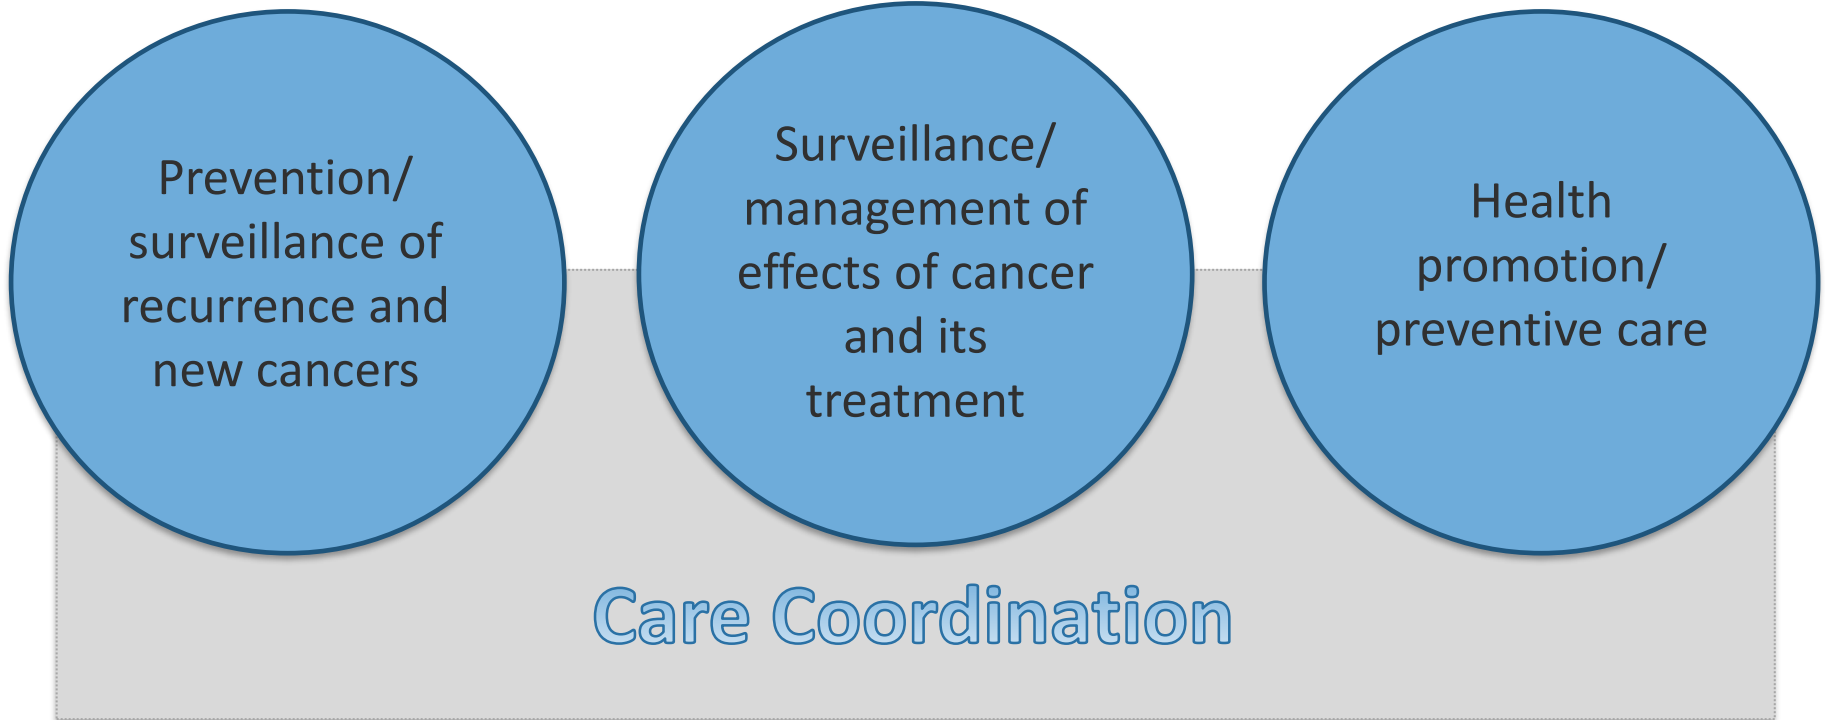

Background

Cancer Survivors:

Estimated prevalence from 1975 to 2040 by age (in millions)

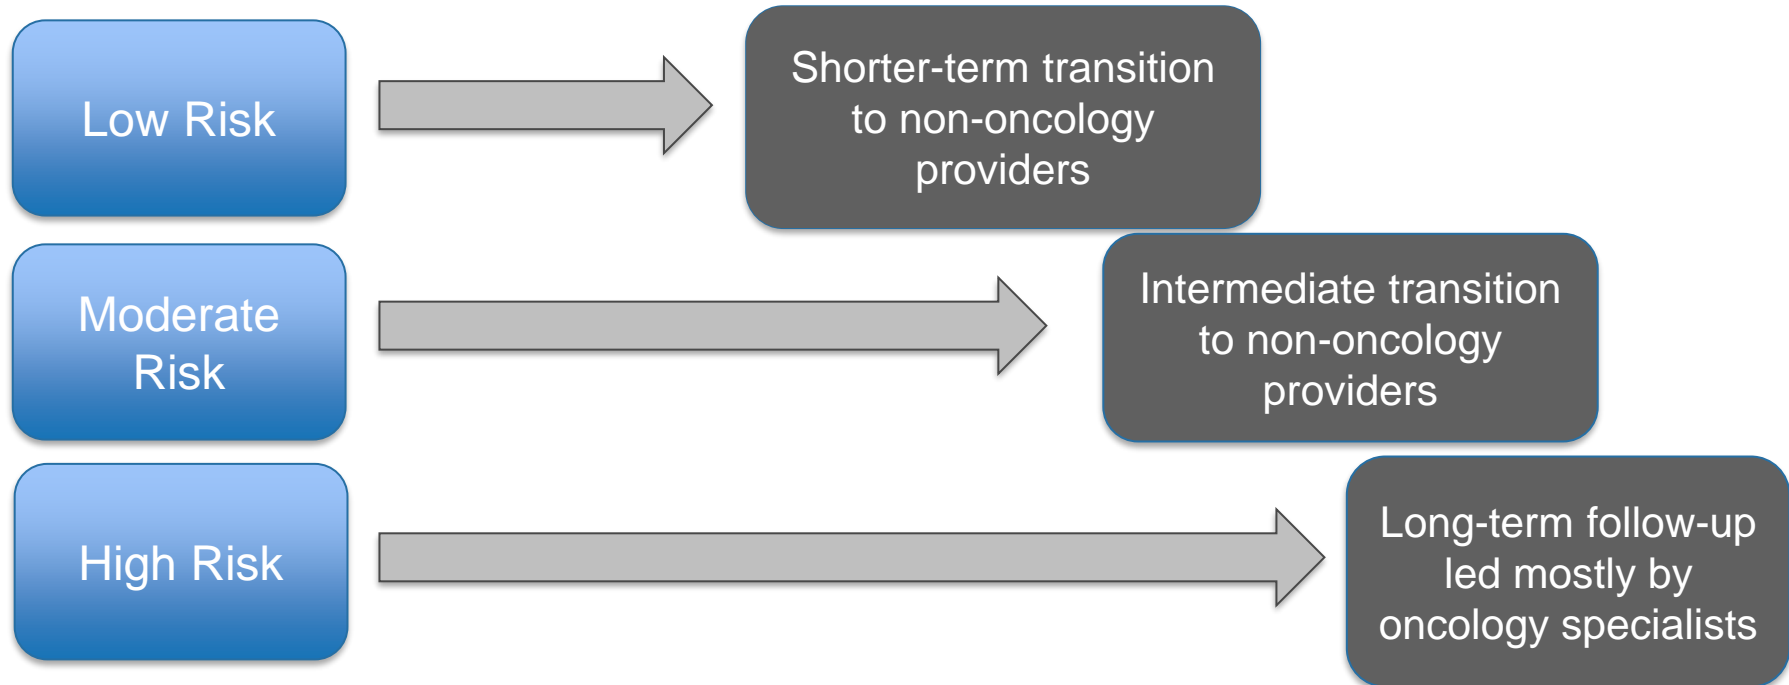

Survivorship Care After Active Treatment

Risk-stratified Survivorship Care

- Follow-up care pathways for survivors tailored based on risk for specific factors, including symptom burden, recurrence, subsequent malignancies, functional impairments

Supplement Notice Details

Administrative Supplements for Development of Risk-Stratified Cancer Survivorship Care Algorithms

- **Goal:** to stimulate research focused on the [development and/or validation of risk-stratification algorithms](#) that categorize survivors into meaningful risk-stratified groups to inform appropriate follow-up care
- NCI is seeking supplement applications that propose methodological approaches to identify individuals within each group

[NOT-CA-20-038](#)

Receipt date: May 15, 2020

Eligibility

- Administrative supplement applications are limited to current NCI-funded projects
- Applicants must hold an active eligible grant (R01, U01, R37, P01, U19, UM1)
- Supplements must support work within the scope of the parent award
 - Can confirm this with your Program Director
- Please see [NOT-CA-20-038](#) for details on application process

Important Considerations

- Applicants should utilize existing parent study data alone or in conjunction with data from other sources (e.g., electronic medical records, cancer registry, and/or claims data)
- Supplement is focused on adult cancer survivors, including adult survivors of childhood cancers
- Applicants may propose a single or multiple cancer types
 - If focusing on one cancer type, application should address how this approach may serve as prototype for other cancers

Budget

- Budgets should not exceed more than \$150,000 in total costs
- Supplement project must be within the currently approved project period for the existing parent award
- Requests for no-cost extensions to accommodate a supplement will not be permitted

Review process

- NCI will conduct reviews of submitted applications and will consider:
 - Scientific merit of the proposed study
 - Innovation of the proposed study
 - Potential of the project to develop and/or validate a risk stratified algorithm
 - Potential of developed algorithm to be utilized to inform care pathways for survivorship care

Tips for Applicants

- Review [NOT-CA-20-038](#) carefully for instructions
- Application Due Date: May 15, 2020
- Webinar and FAQ will be posted on our website: <https://healthcaredelivery.cancer.gov/media>
- Connect with us early
