

SEER-linked Data for Healthcare Delivery Research

Surveillance, Epidemiology and End Results (SEER) data linkages are the result of collaborative efforts between the National Cancer Institute (NCI) and the Centers for Medicare and Medicaid Services (CMS). SEER-Medicare, SEER-CAHPS (Consumer Assessment of Healthcare Providers and Systems) and SEER-MHOS (Medicare Health Outcomes Survey) link SEER cancer registry data with medical and/or patient-reported health information.

Types of Data Available by SEER Linkage

SEER Cancer Registry Data

Medicare Enrollment

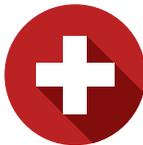

Medicare Advantage Enrollees

Fee-for-Service Enrollees

Claims Data

Physician & Hospital Characteristics

Experience of care (CAHPS) Survey Data

Health-Related Quality of life (MHOS) Survey Data

SEER-Medicare

SEER-CAHPS

SEER-MHOS
