****	Medicare Provider Analysis and Review (MEDPAR) Expanded Modified Record	REC 1032	<p>The representation of a beneficiary stay in an Inpatient hospital or in a skilled nursing facility (SNF) which may include one or more final action claims.</p> <p>The representation of a beneficiary stay in an Inpatient hospital or in a skilled nursing facility (SNF) which may include one or more final action claims. The 1995 Medicare provider analysis and review (MEDPAR) file contains data from claims for services provided to Medicare beneficiaries admitted to Medicare-certified hospitals and skilled nursing facilities (SNF). The file is created quarterly in March, June, September, and December, and is generally available two weeks after the end of the quarter. Each MEDPAR record represents a beneficiary stay in an Inpatient hospital (where discharged) or in a SNF (may be 'still a patient'; complete discharge data not always received), and may include one claim or multiple claims. (Approximately 95% of Inpatient MEDPAR records and 50% of SNF MEDPAR records involve a single claim.)</p> <p>Beginning in June 1995, the Inpatient and SNF claims from the national claims history (NCH) 100% nearline file became the source of MEDPAR. Also effective June, 1995, a MEDPAR record represents final action claims data in which all adjustments have been resolved (thereby eliminating credit-only situations).</p> <p>(Prior to June 1995, MEDPAR was created from claims from the Medicare quality assurance (MQA) system; a MEDPAR record represented an accumulation of adjustment claims, sometimes including credit-only stays.)</p> <p>Effective with the 9/96 update the 1995 MEDPAR was created as follows:</p> <ol style="list-style-type: none"> <li>1. Each month Inpatient and SNF claims are accumulated from the NCH nearline repository.</li> <li>2. At the end of each quarter, the monthly files are merged into a database containing all claims for the current year and prior two</li> </ol>

- years. The database is processed through the final action algorithms.
3. The final-actioned database is split into two segments for each year. Inpatient claims with discharge dates and SNF claims with admission dates in January through September are in the first segment; claims with dates in October through December are in the second segment. This allows for the creation of fiscal year or calendar year files as needed.
  4. The claims remaining from the final action processing are collapsed by claim number, admission date, and provider number (all in ascending order) to create a stay record. The records are further sorted by claim from date, claim thru date, (both in ascending order), HCFA process date (descending), and query code (descending); and the results are used to create MEDPAR.

For the 6/95 through the 6/96 updates the 1995 MEDPAR was created as follows:

- Each month Inpatient and SNF claims are accumulated from the NCH nearline repository.
- At the end of each quarter, the monthly files are merged into a database containing all claims for the current year and prior two years. The database is split into two segments for each year. Inpatient claims with discharge dates and SNF claims with admission dates in January through September are in the first segment; claims with dates in October through December are in the second segment. This allows for the creation of fiscal year or calendar year files as needed.
- The segments are processed through the final action algorithms. The claims remaining from the final action processing are collapsed by claim number, admission date, and provider number (all in ascending order) to create a stay record. The records are further sorted by claim from date, claim thru date, (both in ascending order), HCFA process date (descending), and query code (descending); and the results are used to create MEDPAR.

262	MEDPAR MEDICARE PAYMENT AMOUNT (pmt_amt)	10	<p>Amount of payment made from the Medicare trust fund for the services covered by the claim record. Generally, the amount is calculated by the fi; and represents what was paid to the institutional provider, with the exceptions noted below.</p> <p><b>**NOTE:</b> in some situations, a negative claim payment amount may be present; e.g., (1) when a beneficiary is charged the full deductible during a short stay and the deductible exceeded the amount Medicare pays; or (2) when a beneficiary is charged a coinsurance amount during a long stay and the coinsurance amount exceeds the amount Medicare pays (most prevalent situation involves psych hospitals who are paid a daily per diem rate no matter what the charges are.)</p> <p>Under IP PPS, Inpatient hospital services are paid based on a predetermined rate per discharge, using the DRG patient classification system and the pricer program. On the IP PPS claim, the payment amount includes the DRG outlier approved, payment amount, disproportionate share (since 5/1/86), in-direct medical education (since 10/1/88), total PPS capital (since 10/1/91). It does not include the pass thru amounts (i.e., capital-related costs, direct medical education costs, kidney acquisition costs, bad debts); or any beneficiary-paid amounts (i.e., deductibles and coinsurance); or any other payer reimbursement.</p> <p>Under SNF PPS, SNFs will classify beneficiaries using the patient classification system known as rugs III. For the SNF PPS claim, the SNF pricer will calculate/return the rate for each revenue center line item with revenue center code = '0022'; multiply the rate times the units count; and then sum the amount payable for all lines with revenue center code '0022' to determine the total claim payment amount.</p>
